This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Introduction

THE series here presented carries on in the field of Northern Art the work begun in the two series already published, which illustrate the development of art in Italy during the Early and Late Renaissance.

The earlier painters of the Low Countries have, in accordance with the latest scholarship, been grouped together under the general head of the *School of the Netherlands*, illustrated by the first ninety-seven numbers. Until the war with Spain, after which only can Holland be said to exist except as a petty province, the artists of both northern and southern provinces mingled freely and, wherever their birthplace, soon found their way to Bruges or to Antwerp, the early centers of artistic inspiration and patronage.

The later history of the two sections of country on either side of the Maas is not more strikingly different than was their art-development.

The southern provinces, after one of the most cruel wars on record, returned to their Spanish allegiance and continued in the Catholic faith. Rubens and Van Dyck are the ruling spirits of this period of *Later Flemish Painting*, covered by ninety-two illustrations.

Religious and political conditions differentiated sharply the work of the Dutch painters from that of the Flemings from 1580 on. Hals and Rembrandt are the great names, but the long list of the "Little Dutchmen" serves to show the growth and prosperity of Holland after her triumph in the struggle for political and religious liberty. One hundred and seventy-three prints catalogued under *Dutch School* amply illustrate this period.

In the treatment of German Art, in which are included fifty numbers given to *German Sculpture*, besides the eighty-eight devoted to *German Painting*, every effort has been made to secure a representative and consecutive record of its development from those early days of Bernward, the art-loving Bishop of Hildesheim, to the culmination of the school in the art of Albrecht Dürer and Peter Vischer, and something of success has been attained. The difficulties are, however, twofold: first and most fundamental, the fact that the stormy and disintegrated condition of Germany prevented the consistent development of a protected and nurtured art, Nuremberg being almost the only center of sustained effort; second, the difficulty and in many cases the impossibility of securing photographs of important works which do exist scattered through the smaller cities of the Empire. Despite these difficulties, we feel sure that the student will find here a consecutive and fairly complete record of what Germany has given to the world of art before the opening of the modern period. It finds its appropriate place by the side of Dutch and Flemish Art — not alone because they were contemporaneous, but because they are marked by the same characteristics which distinguish them sharply from the work of Italy and mark their northern spirit.

The lover of beauty, even the earnest student of art from the historical side, can scarcely fail to find his heart sinking as he turns over these pages after becoming thoroughly conversant with the art of the Italian Renaissance. He misses both the homely and the graceful stories told by Giotto and Ghiberti; the pensive pathos of the Madonna of Botticelli and his delicate play of fancy, as well as the riper, completer beauty of Leonardo and Raphael, and the mastery of thought and expression of Michelangelo. The ideal seems lost, so unconvincing and so unattractive are these northern saints and Madonnas. Is art, then, lacking?

Only a cursory study is necessary to reveal first of all that

most fundamental quality of all art — sincerity. Genuineness and nobility of thought are as characteristic of Hubert and Jan Van Eyck as of Orcagna, Fra Angelico, or Ghiberti, their Italian contemporaries. And if they lack that ability to give us the beauty of face and form to which we are accustomed, they are better able to bring to us the reality of the actual personages whom they portray. Madonnas and saints may vary greatly from preconceived or traditional conceptions, but with the donors — the well-to-do burghers and their families, anxious to perpetuate their memories among neighbors or descendants — with these most actual people we feel at once at home. Homely indeed they are, as the artist has uncompromisingly told us, but so are our own friends and neighbors — nor do we like them the less for that. While in Italian Art we dwell among the clouds, feasting our eyes upon ideals, amongst these Northerners we tread the actual earth amongst friends and acquaintances, even though we may never meet them. More than this, we are charmed constantly by the skill and the conscientious care with which every piece of work is done. From Jan Van Eyck and Memling, down through Terborch and Dou to the latest of the decadents, scarcely once will you find a careless brush-stroke. One cannot but admire and enjoy work so perfectly, so exquisitely done.

Religion, politics, and social conditions, as well as natural bent, combined to give prominence, on the one side, to the genre-piece; on the other, to the portrait — not painted for the glory of God, not to adorn the cloister or the altar-wall, to inspire to prayer and contemplation, but for the every-day enjoyment of the people in their homes, to perpetuate the memory of some ancestor or city-father, to reflect scenes with which the home was already familiar. This was the task of the northern artist. And as often in Italian Art we forgive the crudities of form and execution because of the aspiration, the beauty of thought and face still so evident after all the vicissitudes of years, so we

hang over these little Flemish and Dutch canvases with loving intimacy; because, commonplace, even vulgar though the theme may be, their reality and their perfection give them a permanent place in our admiration.

The field of art is wide, and the ruggedness, even the grotesqueness, of this northern art forms a suggestive pendant to the suavity, the idealism, of the southern and more classic art. Idealism and Realism — these are the two elements which have ever struggled for supremacy. From both the modern world learns to gather its enjoyment and its inspiration.
